

You're part of our plan for growth

Integrated Growth Study...

Peterborough is about to grow! We are going to create at least 20,000 new jobs and 25,000 new homes by 2021.

We want your help to decide how we grow - to make Peterborough a bigger, better and greener place to live, work and play.

We are undertaking an Integrated Growth Study (IGS) which will help to set the vision and guiding principles for our development over the next 15 years.

There are three stages to the IGS work:

- 1. Evidence and Issues:**
Gathering information, including your views, about the opportunities and problems facing the Peterborough area.
This is occurring now and is what we are asking you about today.
- 2. Vision and Options:**
Developing a vision for Peterborough's future growth and regeneration.
You will have an opportunity to comment on the vision and spatial options in July 2007.
- 3. Evaluating Options:**
Identifying the best options for our future development.
You will be able to comment on this work in late summer 2007.

You can help to shape Peterborough's Future. Telling us what you think by completing the questionnaire.

We look forward to hearing your views.
